ELECTRONIC MEDICAL RECORDS

JUDGE LEARNING SOLUTIONS understands the complexities and challenges that healthcare organizations face with the implementation or upgrade of an Electronic Medical Records (EMR) system. Judge Learning is well positioned to support our clients from concept to completion. Whether you have just signed your contract, have begun implementation planning or are formulating your training and go-live strategy, Judge Learning delivers solutions to meet your unique business challenges.

JUDGE LEARNING PROVIDES SOLUTIONS FOR MULTIPLE HEALTH INFORMATION SYSTEMS THAT INCLUDE, BUT ARE NOT LIMITED TO:

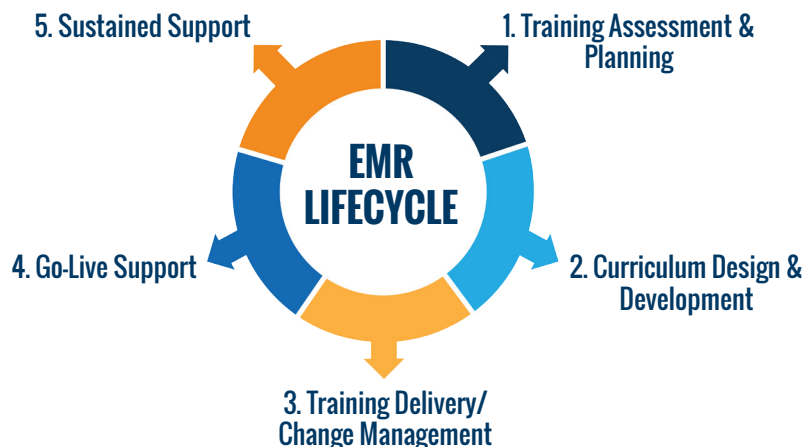

- EPIC
- CERNER
- ALLSCRIPTS
- MEDITECH
- NEXTGEN
- eCLINICAL WORKS
- MCKESSON

Support from the Start

Judge Learning Solutions has the experience and expertise to support our clients EMR solutions from the start. Our talent solutions consist of Certified Analysts, Builders, and Instructors with deep clinical knowledge, to assist our client's internal teams through this transition. We also provide healthcare consultants to better position our clients for success during the review and revision of the supply chain processes, business intelligence strategies, data extraction and clinical reporting requirements.

Supporting the Full Adoption Life Cycle

Judge Learning's EMR practice specializes in providing our clients with highly effective and cost competitive teams of Project Managers, Clinical Information Systems Consultants, Trainers, Coordinators, Administrators, and Developers to assist with one or all of the five critical phases of an EMR system adoption:

Our goal at the completion of an engagement is to ensure that our clients have a sustainable end-user training program, a workforce that is proficient with the software and workflows, and successful adoption and ongoing utilization of the EMR software.
